# 1. About This Manual

## 1.1 Scope of Validity

This manual mainly describes the product information, guidelines for installation, operation, maintenance and troubleshooting. And this manual applies to Afore Single Phase Hybrid Inverter.

AF1K-SL-1   AF1.5K-SL-1   AF2K-SL-1   AF2.5K-SL-1   AF3K-SL-1  
AF3.6K-SL-1  
AF3K-SL      AF3.6K-SL      AF4K-SL      AF4.6K-SL      AF5K-SL      AF5.5K-SL  
AF6K-SL

Please keep this manual available all the time in case of any emergency.

## 1.2 Target Group

This manual is for qualified personnel. The tasks described in this manual must only be performed by qualified personnel.

# 2. Safety & Symbols

## 2.1 Safety Precautions

1. All work on the inverter must be carried out by qualified electricians.
2. The PV panels and inverter must be connected to the ground.
3. Do not touch the inverter cover until 5 minutes after disconnecting both DC and AC power supply.
4. Do not touch the inverter enclosure when operating, keep away from materials that may be affected by high temperatures.
5. Please ensure that the used device and any relevant accessories are disposed of in accordance with applicable regulations.
6. Afore inverter should be placed upwards and handled with care in delivery. Pay attention to waterproof. Do not expose the inverter directly to water, rain, snow or spray.
7. Alternative uses, modifications to the inverter not recommended. The warranty can become void if the inverter was tampered with or if the installation is not in accordance with the relevant installation instructions.

## 2.2 Explanations of Symbols

Afore inverter strictly comply with relevant safety standards. Please read and follow all the instructions and cautions during installation, operation and maintenance.

**Danger of electric shock**

The inverter contains fatal DC and AC power. All work on the inverter must be carried out by qualified personnel only.

**Beware of hot surface**

The inverter's housing may reach uncomfortably hot 60°C (140°F) under high power operation. Do not touch the inverter enclosure when operation.

**Residual power discharge**

Do not open the inverter cover until 5 minutes after disconnection both DC and AC power supply.

**Important notes**

Read all instructions carefully. Failure to follow these instructions, warnings and precautions may lead to device malfunction or damage.

Do not dispose of this device with the normal domestic waste.

Refer to manual before service.

**CE mark**

The inverter complies with the requirements of the applicable CE guidelines.

## 3. Introduction

### 3.1 Basic Instruction

The Afore AF-SL series hybrid inverters are designed to increase energy independence for homeowners. Energy management is based on time-of-use and demand charge rate structures, significantly reduce the amount of energy purchased from the public grid and optimize self-consumption.

### 3.2 Operation Modes

#### 3.2.1 Self-use

##### A. Normal Mode

Priority: Load > Battery > Grid

This mode applies to situation that with low feed in subsidy and high electricity price.

1. Solar energy supply to the local load and charge to the battery first.
2. The excess power export to the public grid.
3. The wind turbines can be connected to the PV.
4. When off gird and the power is lacking, the generator will be turned on automatically.

## B. Stabilize the Power of the Grid

In special self-use mode, the power needs to be fed in/exported from the grid stably with a target value(default value 0), thus keeping grid-friendly in some areas.

### 3.2.2 Charging First

Priority: Battery > Load > Grid

This mode applies to situation with frequent power outages. When the public grid is off, enough energy can be supplied to the local load by the batteries.

Battery will be charged first, and discharge energy for the local load when the grid is off. It would be charged automatically.

### 3.2.3 Selling First

Priority: Load > Grid > Battery

This mode applies to situation with high feed in subsidy.

1. Solar energy supply the local load first, then export to the public grid.
2. The excess energy will be charged into the battery.

### 3.2.4 Command charge and discharge

This mode the charging and discharging power operates according to the set parameters.

Within the power range that the battery can accept, run according to the set parameters, otherwise run the charge and discharge command according to the upper and lower limits of the battery.

### 3.2.5 External EMS dispatch

Priority: Battery charge command > Load > Grid

This mode power of charging and discharging is controlled by external EMS communication commands, which is suitable for occasions with centralized EMS.

To meet the power of EMS charging and discharging, the residual energy is fed back to the grid.

### 3.2.6 EPS

When the grid is suddenly off or abnormal, inverter will change to off grid status automatically. Energy from PV system and battery will supply the local load.

### 3.2.7 Timed charge and discharge

There are 4 types of timed charge and discharge control, each of which can be set for 3 time periods respectively. It operates according to these four types within the set time period, and resumes operation in the setting mode of 3.2.1~3.2.4 after the time expires.

### 3.2.7.1 AC Charge

During the set time period, the battery is charged with the set power. When the PV power is not enough, the power is drawn from the grid until the set SOC is reached, and the timing charging function is stopped.

### 3.2.7.2 Force Charge

During the set time period, the battery is charged with the set power, and the power is only drawn from the PV, not from the grid, and the timing charging function is stopped after the set SOC.

### 3.2.7.3 Force Discharge

During the set time period, discharge the battery with the set power until the set SOC stops the timed discharge function.

### 3.2.7.4 Forbid discharge

During the set time period, the PV power will give priority to the charging, not the load.

## 4. Installation

### 4.1 Pre-installation

#### 4.1.1 Unpacking & Package List

##### Unpacking

On receiving the inverter, please check to make sure the packing and all components are not missing or damaged. Please contact your dealer directly for supports if there is any damage or missing components.

##### Package List

Open the package, please check the packing list shown as below.

No.	Qty	Items	No.	Qty	Items
1	1	Hybrid Inverter	11	1	Grounding Terminal
2	1	Certificate Of Inspection	12	1	Wall Mounting Bracket
3	1	Quick Installation Instructions	13	1	Battery Connector
4	1	Warranty Card	14	1	Monitor Module
5	1	Monitoring Quick Installation Instructions	15	1/2	DC Connector
6	1	CT	16	3	Mounting Bracket Screw
7	4	AC Wiring Cover Screw	17	3	Plastic Expansion Tube
8	1	Security Screw	18	1	Smart Meter (Optional)
9	4	AC Wiring Terminal	19	1	AC Waterproof Cover
10	2	Communication Connectors	20	1	Communication Adapter

**Note:**

DC connectors Qty.: The AF1K-SL-1 ~ AF3.6K-SL-1 is 1 pair of DC plug connector, the AF3K-SL ~ AF6K-SL is 2 pairs.

#### 4.1.2 Product Overview

### Inverter Terminals

No.	Items	No.	Items
1	DC Switch	5	Communication Port
2	DC Connectors (+) For PV Strings	6	AC Port & EPS Port
3	DC Connectors (-) For PV Strings	7	Monitor Module Port
4	Battery Port		

#### 4.1.3 Mounting Location

The inverters are designed for indoor and outdoor installation (IP65), to increase the safety, performance and lifespan of the inverter, please select the mounting location carefully based on the following rules:

- The inverter should be installed on a solid surface, far from flammable or corrosion materials, where is suitable for inverter's weight and dimensions.
- The ambient temperature should be within -25 °C ~ 60 °C (between -13 °F and 140°F).
- The installation of inverter should be protected under shelter. Do not expose the inverter to direct sunlight, water, rain, snow, spray lightning, etc.

- The inverter should be installed vertically on the wall, or lean back on plane with a limited tilted angle. Please refer to below picture.

- Leave the enough space around inverter, easy for accessing to the inverter, connection points and maintenance.

## 4.2 Mounting

Step 1

Step 2

Step 3

## 4.3 Electrical Connection

**Communication Adapter pin assignment**

No.	COM1	COM2
1	NTC+	Meter 485A
2	NTC-	Meter 485B
3	Dry Contact	BAT 485A
4	Dry Contact	BAT CANH
5	DRM	BAT CANL
12345678	DRM	BAT 485B
6	485A	CTU
7	485B	CTN

**Note:**

For diesel generators or multi-machine parallel use, please contact the manufacturer, and provide installation and operation instructions separately.

### 4.3.1 PV Connection

The AF-SL series hybrid inverter has one/two MPPT channels, can be connected with one/two strings of PV panels. Please make sure below requirements are followed before connecting PV panels and strings to the inverter:

- The open-circuit voltage and short-circuit current of PV string should not exceed the reasonable range of the inverters.
- The isolation resistance between PV string and ground should exceed 300 kΩ.
- The polarity of PV strings are correct.
- Use the DC plugs in the accessory.
- The lightning protector should be equipped between PV string and inverter.
- Disconnect all of the PV (DC) switch during wiring.

#### Warning:

The fatal high voltage may on the DC side, please comply with electric safety when connecting.

Please make sure the correct polarity of the cable connected with inverter, otherwise inverter could be damaged.

#### Step 1

#### Note:

- PV cable suggestion
- Cross-section
- 4mm<sup>2</sup>

## Step 2

**Note:**

Please use PV connector crimper to pinch the point of the arrow.

**Note:**

You'll hear click sound when the connector assembly is correct.

## Step 3

### 4.3.2 Battery Connection

AF-SL series hybrid inverters are compatible with lithium battery. For lead acid battery or batteries with other brands, please confirm with local distributor or Afore for technical support.

**Note:**

Set battery type and manufacturer, please refer to Chapter 5.3.  
BMS(Battery Management System)communication is needed between inverter and battery.

**Step 1****Note:**

Battery cable suggestion Cross - section 8-10 AWG  
Please make sure the battery polarities are correct.

**Step 2**

Pass the crimped battery harness through the waterproof connector and the cover.

**Step 3**

Insert the wire harness into the terminals according to "+" and "-" polarity, make the insulated terminals parallel with the terminals , the crimping screw torque is  $2.0\pm0.1\text{N.m}$

## Step 4

A “click” sound will be heard when the connector assembly is correct.

## Step 5

Use an open-end wrench to tighten the waterproof lock.

## Step 6

Insert the battery connector into the inverter, if hear a “click”, it means the battery connection is finished.

### 4.3.2.1 BAT-CAN/RS485

### 4.3.2.2 BAT-NTC

### 4.3.3 Multi Inverter Parallel

#### 4.3.4 AC Connection

The AC terminal contains “GRID” and “EPS”, GRID for load, and EPS for emergency load.

Before connecting, a separate AC breaker between individual inverter and AC input power is necessary. This will ensure the inverter be securely disconnected during maintenance and fully protected from current of AC input.

An extra AC breaker is needed for On-Grid connection to be isolated from grid when necessary. Below are requirements for the On-Grid AC-breaker.

Inverter Model	AC breaker specification
AF1-3.6K-SL-1	32A/200V/230V AC breaker
AF3-6K-SL	63A/200V/230V AC breaker

**Note:**

Qualified electrician will be required for the wiring.

Model	Wire Size	Cable (mm <sup>2</sup> )	Torque value
1-6kW	8-10AWG	4-6	1.2N·m

**Please follow steps for AC connection**

- Connect DC protector or breaker first before connecting.
- Remove insulation sleeve 11mm(0.5 inch) length, unscrew the bolts, insert the AC input wires according to polarities indicated on the terminal block and tighten the terminal screws.

**Step 1**

**Note:**

Cable suggestion  
Cross-section 8-10AWG

**Note:**

The wiring terminals should be wrapped with insulation tape, otherwise it will cause a short circuit and damage the inverter.

**Note:**

The Max. power load connects to EPS port should not exceed the inverter's EPS Max. output power range.

**Step 2****Step 3**

### 4.3.5 CT or Meter Connection

Meter and a current sensor(CT for short below) are used to detect current power direction of the local load and the grid. The output control function of the inverters will be activated based on the detected data.

#### Install the CT

## Install the Meter

## 4.4 Communication Connection

The monitoring module could transmit the data to the cloud server, and display the data on the PC, tablet and smart-phone.

### Install the WIFI / Ethernet / GPRS / RS485 Communication

WIFI / Ethernet / GPRS / RS485 communication is applicable to the inverter. Please refer to "Communication Configuration Instruction" for detailed instruction.

Step 1

Step 2

Turn on the DC switch and AC circuit breaker, and wait until the LED indicator on the monitoring module flashes, indicating that the monitoring module is successfully connected.

## 4.5 Earth Connection

**Note:**

A second protective earth (PE) terminal should be connected to the inverter. This prevents electric shock if the original protective PE wire fails.

**Step 1****Note:**

Earth cable PE suggestion:  
Cross-section (Copper) 4-6mm<sup>2</sup> / 10AWG

**Step 2**

Fix the grounding screw to the grounding connection of the machine housing.

**Note:**

Make sure the earth cables on the inverter and solar panel frame are separately.

## 5. Operation

### 5.1 Control Panel

No.	Items	No.	Items
1	LCD Display	5	ENT Touch Button
2	<b>UP</b> Touch Button	6	<b>POWER</b> LED Indicator
3	<b>DOWN</b> Touch Button	7	<b>GRID</b> LED Indicator
4	<b>ESC</b> Touch Button	8	<b>FAULT</b> LED Indicator

Sign	Power	Color	Explanation
POWER	ON	Green	The inverter is stand-by
	OFF		The inverter is power off
GRID	ON	Green	The inverter is feeding power
	OFF		The inverter is not feeding power
FAULT	ON	Red	Fault occurred
	OFF		No fault

## 5.2 Menu Overview

AF-SL hybrid inverter has a LCD for clearly operating, and menu of the LCD can be presented as following:

## 5.3 Control Panel

The setting is for AF-SL Hybrid inverter. Any doubts, please contact distributor for more details.

### 5.3.1 Time

- Step1: “ $\rightarrow$ ”Entry Menu;  
Step2: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose **System Param**, “ $\rightarrow$ ”Confirm;  
Step3: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose **Date&Time**, “ $\rightarrow$ ”Confirm;  
Step4: “ $\blacktriangle/\blacktriangledown$ ”Set **Year/Mouth/Date/Hour/Minute/Second**, “ $\rightarrow$ ”Confirm;  
Step5: “ $\leftarrow\rightarrow$ ”Return.

### 5.3.2 Safety

- Step1: “ $\rightarrow$ ”Entry Menu;  
Step2: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose **System Param**, “ $\rightarrow$ ”Confirm;  
Step3: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose **Safty**, “ $\rightarrow$ ”Confirm;  
Step4: “ $\blacktriangle/\blacktriangledown$ ”Chose Safety Rule (In the UK , Select **G98/G99**), “ $\rightarrow$ ”Confirm;  
Step5: “ $\leftarrow\rightarrow$ ”Return.

### 5.3.3 PV Mode

- Step1: “—”Entry Menu;  
 Step2: “▲/▼”Up/Down Chose ***Running Param***, “—”Confirm;  
 Step3: Password Confirm,▲/▼ Up/Down Chose “**0**”, “—”Confirm;  
 Step4: “▲/▼”Up/Down Chose ***PV Mode***, “—” Confirm;  
 Step5: “▲/▼”Up/Down Chose ***Independent/Parallel/No Pv***, “—” Confirm;  
 Step6: “”Return.

### 5.3.4 Lithium Battery

- Step1: “—”Entry Menu;  
 Step2: “▲/▼”Up/Down Chose ***Running Param***, “—”Confirm;  
 Step3: Password Confirm,▲/▼ Up/Down Chose “**0**”, “—”Confirm;  
 Step4: “▲/▼”Up/Down Chose ***Lith (Lithium Battery)***, “—” Confirm;  
 Step5: “▲/▼”Up/Down Chose ***IvyHv/JBS48/JBSHV/HSD48/TaiSu/HSDHV/Afore/PYLON/Ivy48/***, “—” Confirm;  
 Step6: “”Return.

### 5.3.5 Lead Acid

- Step1: “—”Entry Menu;  
 Step2: “▲/▼”Up/Down Chose ***Running Param***, “—”Confirm;  
 Step3: Password Confirm,▲/▼ Up/Down Chose “***0***”, “—”Confirm;  
 Step4: “▲/▼”Up/Down Chose ***Lead*** (Lead Acid Battery), “—” Confirm;  
 Step5: “▲/▼”Up/Down Chose ***Capacity/RComp/TComp/VChgMax***, “—” Confirm;  
 Step6: “←”Return.

### 5.3.6 Energy Management System

- Step1: “—”Entry Menu;  
 Step2: “▲/▼”Up/Down Chose ***Running Param***, “—”Confirm;  
 Step3: Password Confirm,▲/▼ Up/Down Chose “***0***”, “—”Confirm;

 Step5: “▲/▼”Up/Down Chose ***EMS Mode***, “—” Entry MES Setting;  
 Step6: “▲/▼”Up/Down Chose ***cmdChar/ExtEMS/SelfUse/ChgFst/SellFst/  
Maintain*** (Maintenance), “—” Confirm;  
 Step7: “←”Return.

### 5.3.7 Timing Charging&Discharging

- Step1: “—”Entry Menu;  
 Step2: “▲/▼”Up/Down Chose ***Running Param***, “—”Confirm;  
 Step3: Password Confirm,▲/▼ Up/Down Chose “0”, “—”Confirm;  
 Step4: “▲/▼”Up/Down Chose ***EMS Param***, “—” Confirm;  
 Step5: “▲/▼”Up/Down Chose ***Chg or Dischg Tim***, “—” Entry MES Setting;  
 Step6: “▲/▼”Up/Down Chose ***Max /Mini Pwr /Max /Mini Volt/Max /Mini Curr***,  
 “—” Confirm;  
 Step7: “”Return.

### 5.3.8 AC Timing Charging

- Step1: “—”Entry Menu;  
 Step2: “▲/▼”Up/Down Chose ***Running Param***, “—”Confirm;  
 Step3: Password Confirm,▲/▼ Up/Down Chose “0”, “—”Confirm;  
 Step4: “▲/▼”Up/Down Chose ***EMS Param***, “—” Confirm;  
 Step5: “▲/▼”Up/Down Chose ***AC Chg(AC Forced Charging)***, “—” Confrim;  
 Step6: “▲/▼”Up/Down Chose ***AC Chg(AC Forced Charging Switch On/Off)/MaxPct***  
 (Max power percentage)/***MaxSoc***(Max SOC)/***TimOn1***(Start time)/***TimOff1*** (Stop time)  
***/TimeOn2***(Start time)/***TimOff2***(Stop time)/***TimOn3***(Start time)/***TimOff3***(Stop Time),  
“—” Confirm, (Supporting max 3 stages charging&discharging time);  
 Step7: “”Return.

### 5.3.9 Forced Charging

- Step1: “—”Entry Menu;
- Step2: “▲/▼”Up/Down Chose **Running Param**, “—”Confirm;
- Step3: Password Confirm,▲/▼ Up/Down Chose “0”, “—”Confirm;
- Step4: “▲/▼”Up/Down Chose **EMS Param**, “—” Confirm;
- Step5: “▲/▼”Up/Down Chose **Force Chg**(Forced Charging setting), “—” Confrim,
- Step6: “▲/▼”Up/Down Chose **Force Chg**(Forced Charging Switch On/Off)/**PForce**  
(Max power percentage)/**MaxSoc**(Max SOC)/**TimOn1**(Start time)/**TimOff1** (Stop time)  
**/TimeOn2**(Start time)/**TimOff2**(Stop time)/**TimOn3**(Start time)/**TimOff3**(Stop Time),  
“—” Confirm, (Supporting max 3 stages charging&discharging time);
- Step7: “←→”Return.

### 5.3.10 Forced Discharging

- Step1: “—”Entry Menu;
- Step2: “▲/▼”Up/Down Chose **Running Param**, “—”Confirm;
- Step3: Password Confirm,▲/▼ Up/Down Chose “0”, “—”Confirm;
- Step4: “▲/▼”Up/Down Chose **EMS Param**, “—” Confirm;
- Step5: “▲/▼”Up/Down Chose **Force DChg**(Forced Discharging setting), “—” Confrim,
- Step6: “▲/▼”Up/Down Chose **Force DChg**(Forced Discharging Switch On/Off)/**PForce**  
(Max power percentage)/**MaxSoc**(Max SOC)/**TimOn1**(Start time)/**TimOff1** (Stop time)  
**/TimeOn2**(Start time)/**TimOff2**(Stop time)/**TimOn3**(Start time)/**TimOff3**(Stop Time),  
“—” Confirm, (Supporting max 3 stages charging&discharging time);
- Step7: “←→”Return.

### 5.3.11 Meter&CT

- Step1: “ $\leftarrow$ ”Entry Menu;
- Step2: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose ***Running Param***, “ $\leftarrow$ ”Confirm;
- Step3: Password Confirm, $\blacktriangle/\blacktriangledown$  Up/Down Chose “**0**”, “ $\leftarrow$ ”Confirm;
- Step4: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose ***Meter param***, “ $\leftarrow$ ” Confirm;
- Step5: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose ***No Meter / CT/ Meter***, “ $\leftarrow$ ” Confrim,
- Step6: if select ***Meter***, “ $\blacktriangle/\blacktriangledown$ ” Up/Down chose ***Afore / Afore3 / UKOB / User2***;
- Step7: if select ***CT***, “ $\blacktriangle/\blacktriangledown$ ” set CT gains,
- Step8: “ $\leftarrow\rightarrow$ ”Return.

### 5.3.12 Protection Parameters

- Step1: “ $\leftarrow$ ”Entry Menu;
- Step2: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose ***Protection Param***, “ $\leftarrow$ ”Confirm;
- Step3: Password Confirm, $\blacktriangle/\blacktriangledown$  Up/Down Chose “**0**”, “ $\leftarrow$ ”Confirm;
- Step4: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose ***ISOChk / Gfcichk / V.max / V.min / F.max / F.min***,
- “ $\leftarrow$ ” Confirm;
- Step7: “ $\leftarrow\rightarrow$ ”Return.

### 5.3.13 Communication Parameters

Step1: “—”Entry Menu;  
Step2: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose **Communication Param**, “—”Confirm;  
Step3: “ $\blacktriangle/\blacktriangledown$ ” Up/Down Chose **Wifi**, “—”Confirm;  
Step4: “ $\blacktriangle/\blacktriangledown$ ”Up/Down Chose **Wifi Addr** (defualt value “1”), “—” Confrim;  
Step5: “ $\blacktriangle/\blacktriangledown$ ” Up/Down Chose **Wifi Prot** (Wifi protocol: “**Modbus / SunSpec**”);  
“—” Confirm;  
Step6: “ $\blacktriangle/\blacktriangledown$ ” Up/Down, if chose **parallel** (Multi-inverter parallel working), “—” Confirm;  
Step7: Under **P Addr**, “ $\blacktriangle / \blacktriangledown$ ” Up/Down chose inverter number of parallel working,  
“—” Confirm;  
Step8: “ $\blacktriangle/\blacktriangledown$ ” Up/Down chose **P Baud**, “—” Confirm;  
Step9: “ $\leftarrow/\rightarrow$ ”Return.

## 6. Power ON/OFF

Please check the following requirements before testing:

- Installation location is suitable according to Chapter 4.1.3.
- All electrical wires are connected tightly, including PV modules, battery and AC side(Such as the grid side, EPS side, Gen side).
- Earth line and Smart meter/CT line are connected.
- AF-DF hybrid inverters should be set according to the required local grid standard.
- More information please contact with Afore or distributors.

## 6.1 Power ON

- Turn on DC switch.
- After LCD lighting, hybrid inverter should be set following Chapter 5.3 at the first time.
- When inverter running under normal mode, Running indicator will light up(Ref. to Chapter 5.1).

## 6.2 Power OFF

- Turn off DC switch ( in hybrid inverter) and all extra-breaker.

**Note:**

Hybrid inverter should be restarted after 5 minutes.

## 6.3 Restart

Restart Hybrid inverter, please follow steps as below:

- Shutdown the inverter Ref. to Chapter6.2.
- Start the inverter Ref. to Chapter 6.1.

# 7. Maintenance & Trouble Shooting

## 7.1 Maintenance

Periodically maintenance are necessary, please follow steps as below.

- PV connection: twice a year
- AC connection(Grid and EPS) : twice a year
- Battery connection: twice a year
- Earth connection: twice a year
- Heat sink: clean with dry towel once a year

## 7.2 Trouble Shooting

The fault messages are displayed when fault occurs, please check trouble shooting table and find related solutions.

## Fault Code and Trouble Shooting

Type of Fault	Code	Name	Description	Recommend Solution
PV Fault	A01	PvConnectFault	PV connection type different from setup	<ul style="list-style-type: none"> <li>Check PV modules connection</li> <li>Check PV Mode setup Ref. Chapter 5.3.</li> </ul>
	A02	IsoFault	ISO check among PV panels/ wires and ground is abnormal.	<ul style="list-style-type: none"> <li>Check PV modules wires, those wires are soaked or damaged, and then carry out rectification.</li> <li>If the fault occurs continuously and frequently, please ask help for local distributors.</li> </ul>
	A03	PvAfciFault	PV current arcing	<ul style="list-style-type: none"> <li>Check PV modules wires and connectors broken or loose connect, and then carry out rectification.</li> <li>If the fault occurs continuously and frequently, please ask help for local distributors.</li> </ul>
	A04	Pv1OverVoltFault	PV Voltage over	<ul style="list-style-type: none"> <li>Reconfiguration of PV strings, reduce the PV number of a PV string to reducing inverter PV input voltage.</li> <li>Suggestion that contacting with local distributors.</li> </ul>
	A05	Pv2OverVoltFault		
	A06	Pv3OverVoltFault		
	A07	Pv4OverVoltFault		
	A08	Pv5OverVoltFault		
	A09	Pv6OverVoltFault		
	A10	Pv7OverVoltFault		
	A11	Pv8OverVoltFault		
	A12	Pv9OverVoltFault		
	A13	Pv10OverVoltFault		
	A14	Pv11OverVoltFault		
	A15	Pv12OverVoltFault		
PV Reverse	A16	PV1ReverseFault	PV(+) and PV(-) reversed Connection	<ul style="list-style-type: none"> <li>Check PV(+) and PV(-) Connect whether reversed or not.</li> <li>If reversed, make correction.</li> </ul>
	A17	PV2ReverseFault		
	A18	PV3ReverseFault		
	A19	PV4ReverseFault		
	A20	PV5ReverseFault		
	A21	PV6ReverseFault		

Type of Fault	Code	Name	Description	Recommend Solution
PV Fault	A22	PV7ReverseFault	PV(+) and PV(-) reversed Connection	<ul style="list-style-type: none"> <li>• Check PV modules partial occlusion or cells damaged.</li> <li>• Check PV module wires and connectors broken or loose connect, then repair it.</li> </ul>
	A23	PV8ReverseFault		
	A24	PV9ReverseFault		
	A25	PV10ReverseFault		
	A26	PV11ReverseFault		
	A27	PV12ReverseFault		
	A33	Pv1AbnormalFault		
	A34	Pv2AbnormalFault		
	A35	Pv3AbnormalFault		
	A36	Pv4AbnormalFault		
	A37	Pv5AbnormalFault		
	A38	Pv6AbnormalFault		
	A39	Pv7AbnormalFault		
	A40	Pv8AbnormalFault		
	A41	Pv9AbnormalFault		
	A42	Pv10AbnormalFault		
	A43	Pv11AbnormalFault		
	A44	Pv12AbnormalFault		
	A45	Pv13AbnormalFault		
	A46	Pv14AbnormalFault		
	A47	Pv15AbnormalFault		
	A48	Pv16AbnormalFault		
	A49	Pv17AbnormalFault		
	A50	Pv18AbnormalFault		
	A51	Pv19AbnormalFault		
	A52	Pv20AbnormalFault		
	A53	Pv21AbnormalFault		
	A54	Pv22AbnormalFault		
	A55	Pv23AbnormalFault		
	A56	Pv24AbnormalFault		

Type of Fault	Code	Name	Description	Recommend Solution
Battery Fault	B01	PcsBatOverVoltFault	Battery voltage over or under	<ul style="list-style-type: none"> <li>• Check inverters connected battery lines and connectors broken or loose connect.</li> <li>• Carry out rectification if broken or loose.</li> <li>• Checking battery voltage is abnormal or not, then maintenance or change new battery.</li> </ul>
	B02	PcsBatUnderVoltFault		
	B03	PcsBatInsOverVoltFaul		
	B04	PcsBatReversedFault	Bat. (+) and Bat. (-) are reversed.	<ul style="list-style-type: none"> <li>• Check Bat.(+) and Bat.(-)connect reversed or not.</li> <li>• Make correction if reversed.</li> </ul>
	B05	PcsBatConnectFault	Battery wires loose	<ul style="list-style-type: none"> <li>• Check battery wires and connectors damage or loose connect.</li> <li>• Carry out rectification if break.</li> </ul>
	B06	PcsBatComFault	Battery communication abnormal	<ul style="list-style-type: none"> <li>• Check battery side communication wires damage or loose connect, and then carry out rectification.</li> <li>• Check battery is off or other abnormal, then Mastertenance battery or change new battery.</li> </ul>
	B07	PcsBatTempSensorOpen	Battery temperature sensor abnormal	<ul style="list-style-type: none"> <li>• Check battery temperature sensor and connected wires damage or not , then rectification or change new one.</li> </ul>
	B08	PcsBatTempSensorShort		
	B09	BmsBatSystemFault	All these faults will be detected or reported by battery BMS.	<ul style="list-style-type: none"> <li>• If specific fault high temperature or low temperature, then should change battery installed environment temperature.</li> <li>• Restart battery, maybe can working as normal.</li> <li>• If this fault occurs continuously and frequently, please ask help for local distributors.</li> </ul>
	B10	BmsBatVolOverFault		
	B11	BmsBatVolUnderFault		
	B12	BmsCellVolOverFault		
	B13	BmsCellVolUnderFault		
	B14	BmsCellVolUnbalanceFau

Bat. between AC Efficiency (%)			96.8			
Protection	AF1K-SL-1	AF1.5K-SL-1	AF2K-SL-1	AF2.5K-SL-1	AF3K-SL-1	AF3.6K-SL-1
PV Reverse Polarity Protection			Yes			
Over Current/Voltage Protection			Yes			
Anti-Islanding Protection			Yes			
AC Short Circuit Protection			Yes			
Residual Current Detection			Yes			
Ground Fault Monitoring			Yes			
Insulation Resister Detection			Yes			
PV Arc Detection			Yes			
Enclosure Protect Level			IP65 / NEMA4X			
General Data	AF1K-SL-1	AF1.5K-SL-1	AF2K-SL-1	AF2.5K-SL-1	AF3K-SL-1	AF3.6K-SL-1
Dimensions (L x W x H, mm)			513 x 370 x 192			
Weight (kg)			17			
Topology			Transformerless			
Cooling			Intelligent Fan			
Relatively Humidity			0 - 100 %			
Operating Temperature Range (°C)			- 25 to 60			
Operating Altitude (m)			< 4000			
Noise Emission (dB)			< 25			
Standby Consumption (W)			< 10			
Mounting			Wall Bracket			
Communication with RSD			SUNSPEC			
Display & Communication Interfaces			LCD, LED, RS485, CAN, Wi-Fi, GPRS, 4G			
Certification & Approvals	NRS97, G98/G99, EN50549-1, C10/C11, AS 4777, VDE-AR-N4105, VDE0126, IEC62040, IEC62109-1, IEC62109-2					
EMC	EN61000-6-2, EN61000-6-3					

PV Input	AF3K-SL	AF3.6K-SL	AF4K-SL	AF4.6K-SL	AF5K-SL	AF5.5K-SL	AF6K-SL
Max. Input Power (kW)	4.5	5.4	6.0	6.9	7.5	8.3	9.0
Max. PV Voltage (V)				550			
MPP Range (V)				80 - 500			
Full MPPT Range (V)	90 - 500	110 - 500	120 - 500	130 - 500	150 - 500	160 - 500	170 - 500
Normal Voltage (V)				360			
Startup Voltage (V)				100			
Max. Input Current (A)				18.5 x 2			
Max. Short Current (A)				26 x 2			
No. of MPP Tracker / No. of PV String				2 / 2			
Battery Port	AF3K-SL	AF3.6K-SL	AF4K-SL	AF4.6K-SL	AF5K-SL	AF5.5K-SL	AF6K-SL
Max. Charge/Discharge Power (kW)	3.0	3.6	4.0	4.6	4.8	4.8	4.8
Max. Charge/Discharge Current (A)				80			
Battery Normal Voltage (V)				51.2			
Battery Voltage Range (V)				40 - 60			
Battery Type				Li-ion / Lead-acid etc.			
AC Grid	AF3K-SL	AF3.6K-SL	AF4K-SL	AF4.6K-SL	AF5K-SL	AF5.5K-SL	AF6K-SL
Max Continuous Current (A)	14.0	17.0	19.0	22.0	23.0	26.0	28.0
Max Continuous Power (kVA)	3.0	3.6	4.0	4.6	5.0	5.5	6.0
Nominal Grid Current(A)	13.7 / 13.1	16.4 / 15.7	18.2 / 17.4	21.0 / 20.0	22.8 / 21.8	25.0 / 24.0	27.3 / 26.1
Nominal Grid Voltage (V)				198 to 242 @ 220 / 207 to 253 @ 230			
Nominal Grid Frequency (Hz)				50 / 60			
Power Factor				0.999 (Adjustable from 0.8 overexcited to 0.8 underexcited)			
Current THD (%)				< 3			
AC Load Output	AF3K-SL	AF3.6K-SL	AF4K-SL	AF4.6K-SL	AF5K-SL	AF5.5K-SL	AF6K-SL
Max Continuous Current (A)	14.0	17.0	19.0	22.0	23.0	26.0	28.0
Max Continuous Power (kVA)	3.0	3.6	4.0	4.6	5.0	5.5	6.0
Max Peak Current (A) (10min)	20.5 / 19.6	24.6 / 23.5	27.3 / 26.1	31.4 / 30	34.1 / 32.7	37.8 / 36.1	41.0 / 39.2
Max Peak Power (kVA) (10min)	4.5	5.4	6.0	6.9	7.5	8.3	9.0
Nominal AC Current (A)	13.7 / 13.1	16.4 / 15.7	18.2 / 17.4	21.0 / 20.0	22.8 / 21.8	25.0 / 24.0	27.3 / 26.1
Nominal AC Voltage L-N (V)				220 / 230			
Nominal AC Frequency (Hz)				50 / 60			
Switching Time (s)				Seamless			
Voltage THD (%)				< 3			
Efficiency	AF3K-SL	AF3.6K-SL	AF4K-SL	AF4.6K-SL	AF5K-SL	AF5.5K-SL	AF6K-SL
CEC Efficiency (%)				97.0			
Max. Efficiency (%)				97.6			
PV to Bat. Efficiency (%)				98.1			
Bal. between AC Efficiency (%)				96.8			
Protection	AF3K-SL	AF3.6K-SL	AF4K-SL	AF4.6K-SL	AF5K-SL	AF6K-SL	AF6K-SL
PV Reverse Polarity Protection				Yes			
Over Current/Voltage Protection				Yes			
Anti-Islanding Protection				Yes			
AC Short Circuit Protection				Yes			
Residual Current Detection				Yes			
Ground Fault Monitoring				Yes			
Insulation Resister Detection				Yes			
PV Arc Detection				Yes			
Enclosure Protect Level				IP65 / NEMA4X
